

Jadelle®

Contraceptive Implants up to 5 years

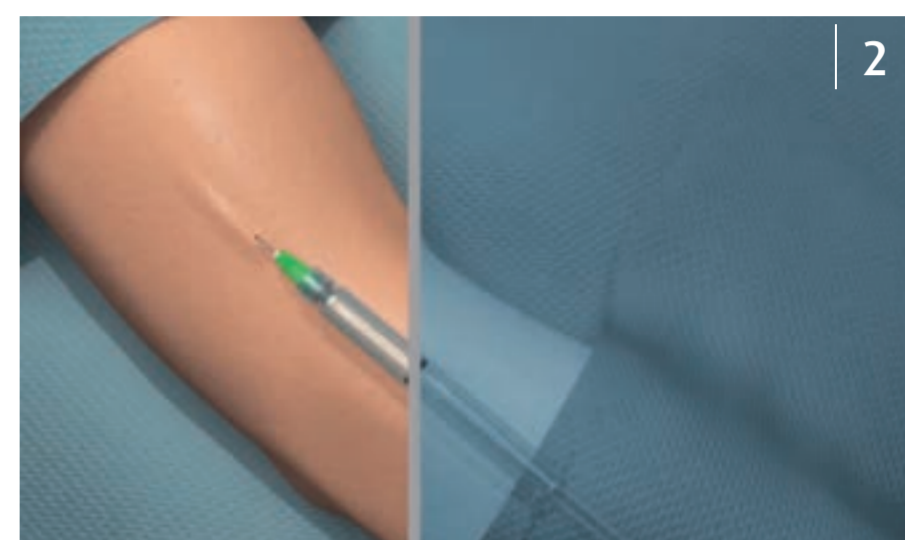

First Implants WHO-prequalified*

*September 2009

Insertion

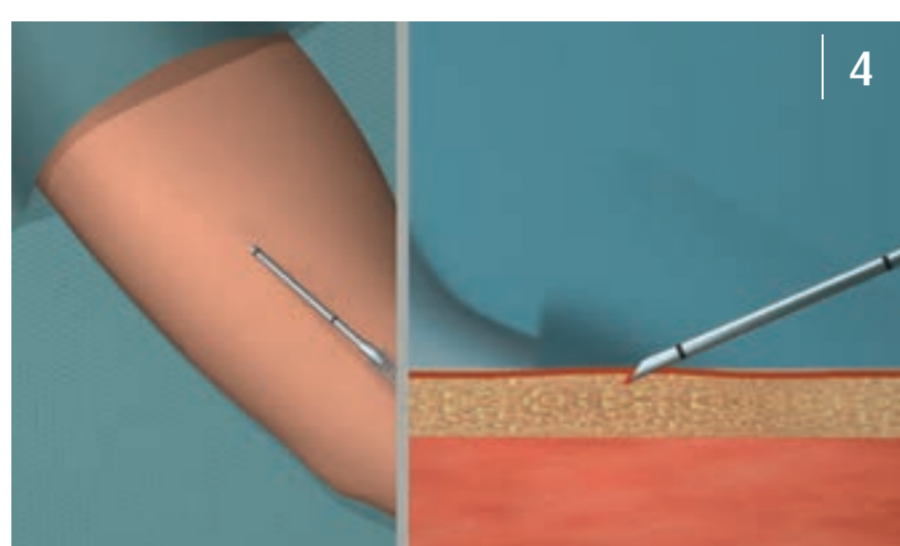

1
The implants will be inserted subdermally.

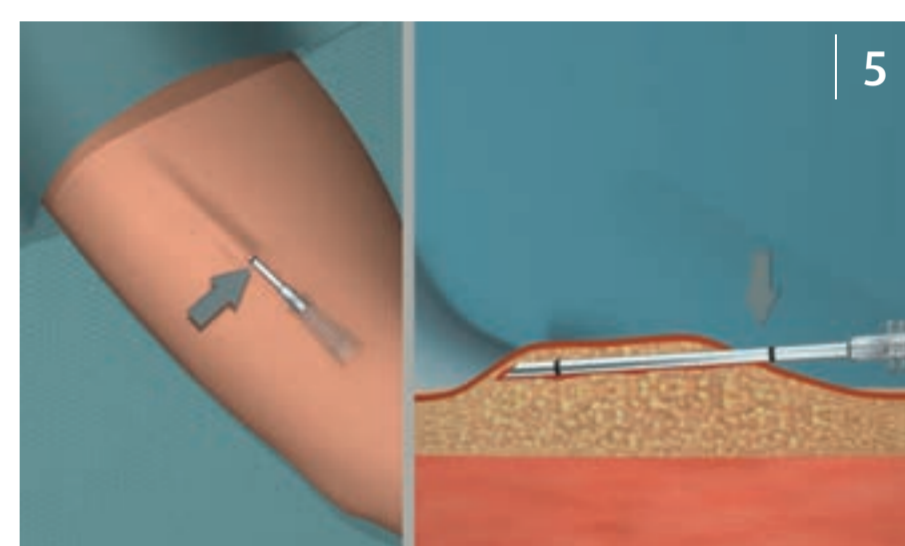

2
Anaesthetize the insertion area.

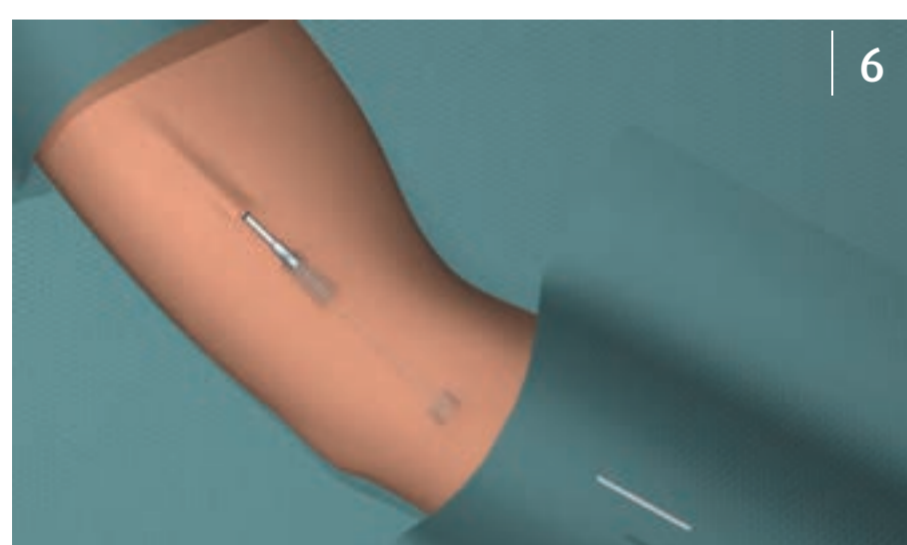

3
Use the new disposable trocar.

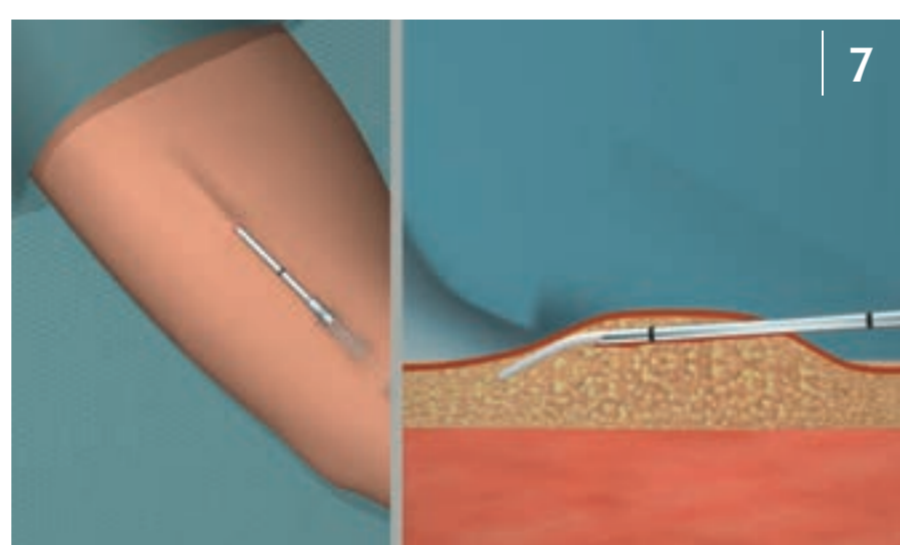

4
Introduce the trocar just beneath the skin.

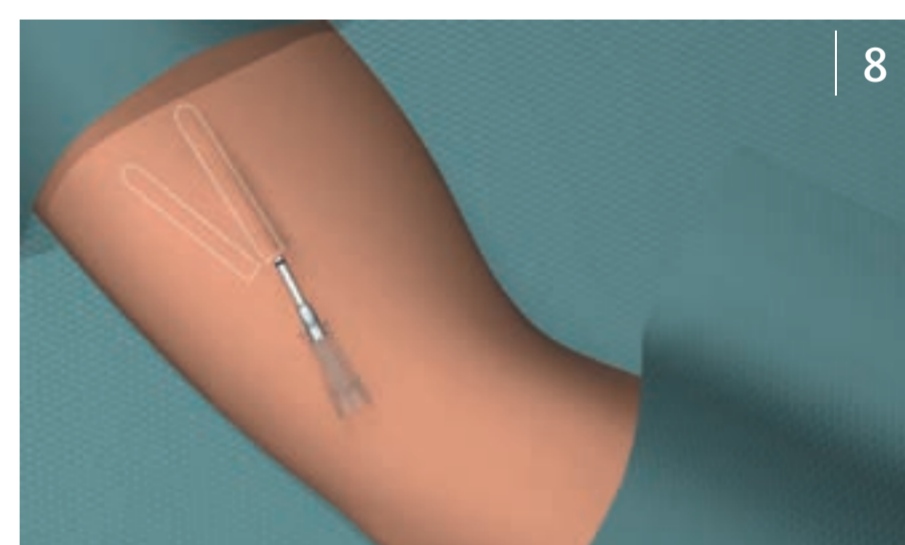

5
Advance to the ring mark, while "tenting".

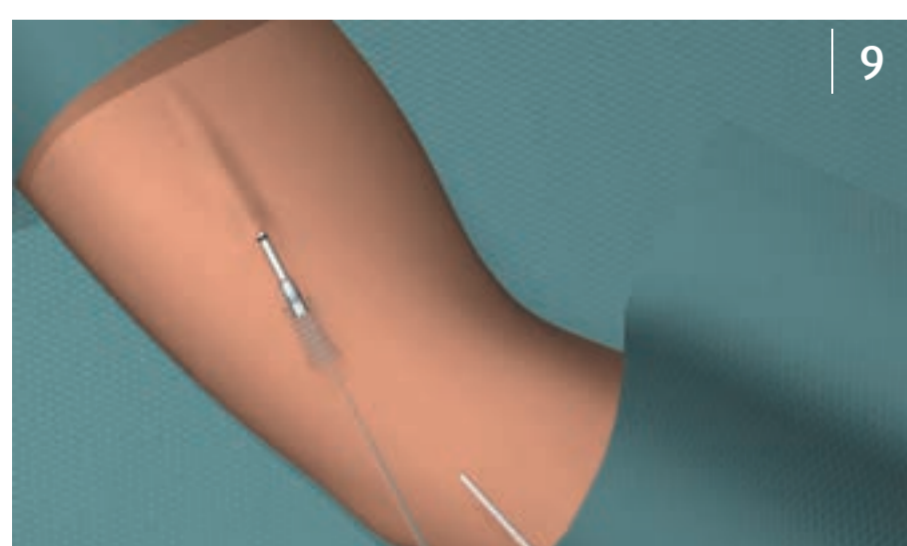

6
Remove the plunger and load the first implant.

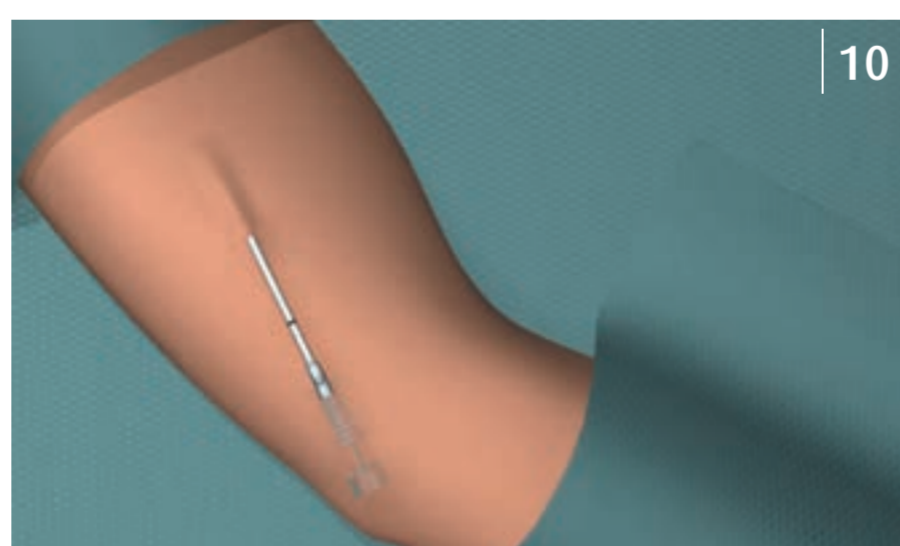

7
Hold the plunger steady and pull the trocar to the mark near the tip.

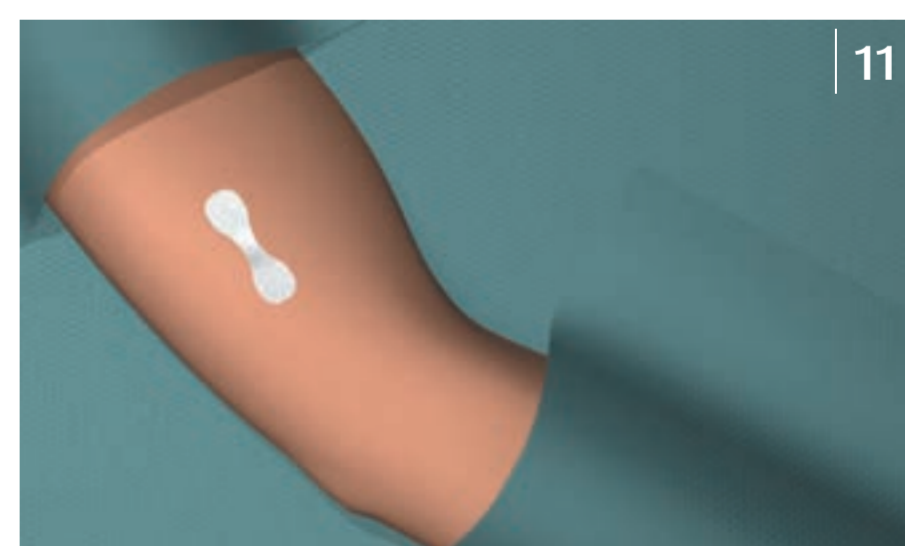

8
Advance again to the mark forming a narrow V.

9
Remove the plunger and load the second implant.

10
Hold the plunger steady while pulling the trocar back.

11
After the insertion close the incision with a sterile skin closure.
